

# About UIH

## United Information Highway Co., Ltd.

UIH is Thailand's leading Digital Infrastructure and Solution Provider for Business, providing inclusive digital services under Managed Network Services to serve future technology needs in the enterprises.

### Managed Network Services

Comprehensive high-speed internet services through a stable and secure fiber optic network. Leveraging state-of-the-art technologies, UIH ensures fast and secure data transmissions over its fiber-optic network.

### Managed Cloud Services

Cloud services, including data centers, backup centers, and business continuity workspaces, streamlining organizational workflows. These services provide secure data storage, dependable backup and recovery, and operational resilience, enhancing flexibility and efficiency.

### Digital Services

Accelerate your digital business capabilities for the digital-first world era with our world-class platforms from Microsoft, Google, Adobe, and many more.

### Managed Security Services

Keep abreast of new cyber threats and plug any loophole in your computer system with UIH Security Services. To prevent your organization from becoming the next cyber victim, UIH has prepared ICT solutions for you to efficiently manage all kinds of risks.
